An Intensive Full Stack Web Development Program dedicated to enhancing skills with relevant industry used languages and programs.

⭐ Crypto Currency App
March 2021 — April 2021

Crypto Currently is an app designed for new investors looking to build a crypto currency portfolio. I was the project manager, and also wrote the Javascript code. I used J Query and JavaScript to code the user assessment. We are using local storage and fetching web APIs from two separate third party API to retrieve data on crypto coins. For this project, I used Foundation Library.
